

Safety data sheet

Complies with Regulation (EC) No. 1907/2006 (REACH) as amended by Regulation (EU) 2015/830

Version: 6.0

Industrial NITROGEN Revision date: 10/14/2021 Issue date: 10/14/2021 SDS reference: EIGA089A SECTION 1: Identification of the substance/mixture and company/undertaking 1.1. Product identifier Industrial NITROGEN Trade name EIGA089A MSDS No. Chemical description CAS number: 7727-37-9 N°ONE: 1066 EC number: 231-783-9 Registration number Listed in Annex IV/V of REACH, exempt from registration Chemical formula N2 1.2. Relevant identified uses of the substance or mixture and uses advised against Relevant uses identified Industrial and professional. Carry out a risk analysis before use Test or calibration gas Purge, dilution, inerting gas. Protective gas for welding processes. Use in the manufacture of electronic or photovoltaic components. Laboratory use. Contact the supplier for more information on use Uses advised against Consumer use 1.3. Information regarding the supplier of the safety data sheet Company identification SARL RAYANOX ZA Bethioua Wilaya of Oran, Algeria Tel: 041-79-35-22 Fax: 041-79-32-23 Contact@rayanox.co sarlrayanox@gmail.com 1.4. Emergency call number Emergency call number Tel: +21365550342 SECTION 2: Hazard Identification 2.1. Classification of the substance or mixture Classification according to Regulation (EC) No. 1272/2008 [CLP] H280 Physical hazards Gas under pressure: Compressed gas 2.2. Label elements Labeling according to Regulation (EC) No. 1272/2008 [CLP] Hazard pictograms (CLP) Signal word (CLP) : Attention Hazard statements (CLP) : H280 - Contains gas under pressure; may explode if heated Precautionary statements (CLP) - Storage : P403 - Store in a well-ventilated area. 2.3. Other dangers : Asphyxiant at high concentration. **SECTION 3: Composition/information on ingredients** 3.1. Substances

3.2. Mixtures: Not applicable

SECTION 4: First aid

Rayan	Indu	Istrial NITROGEN	
Issue date: 10/14/2021 SDS reference: EIGA089A	Replaces sheet: 4.0	Revision date: 10/14/2021	Version: 6.0
4.1. Description of first aid			
- Inhalation		Move the victim to an uncontaminated area, putting on a breathin Individual autonomy (ARI). Keep the victim warm and at rest. Call a Perform cardiopulmonary resuscitation if the victim stops breathin	a doctor.
- - Skin contact - Eye contact		Perform cardiopulmonary resuscitation if the victim stops breathin No adverse effects expected with this product. No adverse effects expected with this product.	g breathe more
 Ingestion 4.2. Most important sympton 	ns and effects, both acute	Ingestion is not considered a possible mode of exposure <u>e and delayed</u> May cause asphyxiation at high concentrations. Symptoms may inc	clude loss of consciousne
4.3. Indication of any immed	iste medical attention an	or motor skills. The victim may not be aware of the asphyxiation. Refer to section 11.	
4.3. <u>Indication of any infined</u>		: None).	
SECTION 5: Fire-fighting m 5.1. Extinguishing media	easures		
- Suitable extinguishing agents	The prod	ray or cloud uct does not burn, use fire-fighting measures appropriate for the sur	rrounding fire.
 Unsuitable extinguishing ager 5.2. Special hazards arising fr 	om the substance or mixt		
pecific risks lazardous combustion products 5.3. Advice for firefighters	Exposure None).	to fire may cause containers to rupture and explode	
pecific methods		Use extinguishing media suitable for the surrounding fire. Exposure cause gas containers to rupture. Cool exposed containers with wat location. Do not allow watering water used in emergency cases to If possible, stop the gas flow. Use water spray or cloud to reduce the fumes to the ground if possi-	er spray from a protect flow into the gutters.
		Move containers from fire area if it can be done without risk.	
Special protective equipment for firefigh	ters	In confined spaces use a personal self-contained breathing appara Protective clothing and self-contained breathing equipment for fire Standard EN 137 - Autonomous open circuit compressed air device Standard EN 469: protective clothing for firefighters. Standard EN 4 For firefighters	efighters e with a full face mask.
SECTION 6: Measures to be	e taken in the even	t of accidental release	
6.1. <u>Personal precautions, pr</u> or non-rescuers	otective equipment and e	emergency procedures Act according to the local emergency plan.	
		Try to stop the leak	
		Evacuate the area.	
		Ensure adequate air ventilation. Use protective clothing.	
		Prevent the product from entering sewers, basements, pits, or any accumulation could be dangerous. Stay upwind.	other location where it
for first aiders		See section 8 of the SDS for more information on personal protect Wear a self-contained breathing apparatus (SCBA) when entering t verified that it is safe. Oxygen detectors should be used when asphyxiating gases may be See section 5.3 of the SDS for more information	the area unless you have
6.2. <u>Precautions for environn</u>	nental protection	Try to stop the leak.	
6.3. <u>Methods and material fo</u>	or containment and cleani	Liquid spills can cause embrittlement of building materials ing up Ventilate the area	
6.4. <u>Reference to other SECT</u>	<u>IONS</u>	See also sections 8 and 13

Rauan	Ind	ustrial NITROGEN			
L'Air & la Maniere Issue date: 10/14/2021 SDS reference: EIGA089A	Replaces sheet: 4.0	Revision date: 10/14/2021	Version: 6.0		
Safety when using the product		The product must be handled in accordance with good industrial hygiene a procedures.	and safety		
Safety when handling the gas container		Only persons with appropriate experience and training should handle gase Consider adding pressure safety valve(s) to the installation. You ensure that the entire gas installation has been (or is regularly) checke of leaks, before use Do not smoke while handling the product. Use only specified equipment appropriate for this product and its operatin temperature. Contact your gas supplier if in doubt. Avoid the return of water, acids and alkalis Use only with cleaned equipment approved for oxygen use and calculated pressures Avoid the return of water, acids and alkalis. Do not breathe the gas. Avoid letting the product into the air Refer to the supplier's instructions for handling the container. Prohibit products from rising into the container	ed for the absence		
		Protect cylinders from physical damage, do not pull, roll, slide, drop To move the bottles even a short distance, use a cart (bottle rolls, etc.), designed for transporting bottles Leave the tap protection cap in place until the container is again secured e support or placed in a container or placed in position for use. If the user encounters any difficulty opening or closing the cylinder valve, t discontinue use and contact the supplier Never attempt to repair or modify a container valve or its pressure relief d Damaged faucets should be reported immediately to the supplier Keep tap outlets from containers clean and not contaminated, particularly If the container has been equipped with one, as soon as it has been discon installation, replace the cap or the tap outlet cap. Close the container tap after each use and when empty, even if it is still co equipment. Never attempt to transfer gases from a bottle/container into another cont Never use a direct flame or electric heater to increase the pressure in the o Do not remove or damage the labels put by the supplier to identify the cor bottle.	the user should devices. y with oil or water. nnected from the onnected to the tainer. container.		
7.2. Conditions for safe storage,	including any incom	Prevent water from being drawn into the container. Open the tap slowly to avoid a sudden build-up of pressure (water hamme natibilities	er).		
	<u>Incluaing any incom</u>	pationities For further recommendations for the safe storage of liquid oxygen, liquid r argon, see EIGA Doc. 115 "Storage of Cryogenic Air Gases at Users Premise from http://www.eiga.eu and consult the supplier. Follow all local regulations and requirements for container storage. Containers should not be stored in conditions likely to aggravate corrosion Container valve covers or caps must be in place. Containers in stock should be periodically checked for general condition ar leaks. Store the container in a well-ventilated area, at a temperature below 50°C In storage, separate flammable gases and other flammable materials Store containers in areas not exposed to the risk of fire and away from sou ignition. Keep away from combustible materials	es" downloadable n. alling. nd absence of		
7.3. <u>Specific end use(s)</u>		: None).			
SECTION 8: Exposure controls	SECTION 8: Exposure controls/personal protection				
8.1. <u>Control Settings</u> OEL (Occupational Exposure Limits)		: Not available.			
DNEL (Derived No Effect Dose) PNEC (Predicted No Effect Concentration(s))		: Not available. : Not available.			

8.2. Exposure controls

8.2.1. Appropriate technical controls

Maintain appropriate exhaust ventilation locally and overall. Pressure equipment should be checked regularly for leaks

EN: French

3/7

SDS reference: EIGA089A	Replaces sheet: 4.0	Revision date: 10/14/2021 Version: 6.0
8.2.2. Personal protective equip	nent	Gas detectors should be used when oxidizing gases are likely to be released Think about work permits, e.g. for maintenance.
		A risk analysis of the use of the product must be carried out and documented in all workplaces affected by the use of the product in order to choose personal equipment regarding the identified risks. The following recommendations should be considered Choose Personal Protective Equipment that complies with recommended EN/ISO standards.
Eye/face protection		Wear tight safety glasses and a face shield when transferring or disconnecting transfer lines. Standard EN 166 - Individual eye protection - Specifications.
Skin protection		
-Hand protect	tion	Wear protective gloves when handling gas cylinders. Standard EN 388-Protective gloves against mechanical risks.
– Miscellaneou	IS	Wear safety shoes when handling cylinders. Standard EN ISO 20345: Personal Protective Equipment - safety shoes.
Respiratory protection		Self-contained breathing apparatus (SCBA) or mask with positive pressure air supply should be used in under-oxygenated atmospheres. Standard EN 137 - Autonomous open circuit compressed air device with full face mask
Thermal risks		No additions to previous sections
8.2.3. Ambient exposure control	S	
		None are necessary.
SECTION 9: Physical and chem	ical properties	

Information on essential physical and chemical properties

Appearance	
 Physical state at 20°C / 101.3kPa 	: Gaseous
Color	: Colorless.
Smell	: Not detectable by odor
Olfactory threshold	: Detection of thresholds by smell is subjective and inappropriate for warning in the event of
	overexposure
рН	: Not applicable to gases and gas mixtures.
Melting point / Freezing point	:-210°C
Boiling point	:-196°C
Flash point	: Not applicable to gases and gas mixtures.
Evaporation rate	: Not applicable to gases and gas mixtures.
Flammability (solid, gas)	: Non-flammable.
Explosive limits	: Non-flammable.
Vapor pressure [20°C]	: Not applicable.
Vapor pressure [50°C]	: Not applicable.
Vapor density	: Not applicable.
Relative density, liquid (water=1)	: Not applicable.
Relative density, gas (air=1)	: 0.97
Water solubility	: 20 mg/l
Partition coefficient n-octanol/water (Log Kow)	: Not applicable to inorganic gases
Auto-ignition temperature	: Non-flammable.
Decomposition temperature	: Not applicable.
Viscosity	: No reliable data available.
Explosive properties	: Not applicable.
Oxidizing properties	: Not applicable.
Other information	
Molar mass	28 g/mol
Critical temperature [°C]	-147°C
Other data	Gas or vapor heavier than air. May accumulate in confined areas, especially in low areas and basements
SECTION 10: Stability and reactivity	
10.1. <u>Reactivity</u>	
	No reactivity hazard other than the effects described in the sections below
10.2 Chamical stability	
10.2. Chemical stability	
	Stable under normal conditions.
10.3. Possibility of hazardous reactions	
	None).
10.4. Conditions to sucid	
10.4. <u>Conditions to avoid</u>	
	Avoid humidity in installations.
