

Safety data sheet

Version: 5.0

Complies with Regulation (EC) No. 1907/2006 (REACH) as amended by Regulation (EU) 2015/830 Medical NITROGEN PROTOXYDE Issue date: 10/14/2021 Revision date: 10/14/2021 SDS reference: EIGA093A SECTION 1: Identification of the substance/mixture and company/undertaking 1.1. Product identifier NITROUS OXIDE Trade name EIGA093A MSDS No. Chemical description CAS number: 10024-97-2 N°ONE: 1070 EC number: 233-032-0 **REACH** registration number 01-2119970538-25 Chemical formula N20 1.2. Relevant identified uses of the substance or mixture and uses advised against Relevant uses identified See the list of identified uses and exposure scenarios in the appendix of the SDS. Uses advised against Do not inhale the product intentionally, due to the risk of asphyxiation. Do not inhale the product intentionally due to its narcotic effects. 1.3. Information regarding the supplier of the safety data sheet Company identification SARL RAYANOX ZA Bethioua Wilaya of Oran, Algeria Tel: 041-79-35-22 Fax: 041-79-32-23 Contact@rayanox.co sarlrayanox@gmail.com 1.4. Emergency call number Emergency call number Tel: +21365550342 **SECTION 2: Hazard Identification** 2.1. Classification of the substance or mixture Classification according to Regulation (EC) No. 1272/2008 [CLP] Physical hazards Oxidizing gases, Category 1 H270 Gas under pressure: Liquefied gas H280 Health hazards Specific target organ toxicity — Single exposure, category 3, H336 Narcotic effects 2.2. Label elements Labeling according to Regulation (EC) No. 1272/2008 [CLP] Hazard pictograms (CLP) Signal word (CLP) : Hazard Hazard statements (CLP) : H270 - May cause or aggravate a fire; oxidant. : H280 - Contains gas under pressure; may explode if heated. : H336 - May cause drowsiness or dizziness. Precautionary statements (CLP) P260 - Do not breathe gases, vapors Prevention: P244 - No oil or grease on taps and fittings. P220 - Keep away from clothing and other combustible materials. P304+P340+P315 - IF INHALED: remove victim to fresh air and keep at rest in a position where Intervention: they can breathe comfortably. Seek medical attention immediately. P370+P376 - In the event of fire: close the leak if it can be done without danger. – Storage : P403 - Store in a well-ventilated area. Additional Information Do not inhale the product intentionally, due to the risk of asphyxiation. Do not inhale the product intentionally due to its narcotic effects. 2.3. Other dangers

Medical NITROGEN PROTOXYDE

Replaces sheet: 4.0

Revision date: 10/14/2021

Version: 5.0

: Contact with liquid may cause cold burns and frostbite.

SECTION 3: Composition/information on ingredients

3.1. Substances

| NAME | Product identifier | % | Impurities in ppm | | | Classification according to Regulation (EC) No. 1272/2008 [CLP] | |
|----------------------|--|---------------------|-------------------|-------|----------|--|--|
| | (CAS No.) 10024-97-2 >99. [EC No.) 233-032-0 >99. REACH registration number: 01- 2119970538-25 | <u>>99,998</u> — | H2O | со | CO2 | NOX | Ox. Gas 1, H270 Press. Gas (Liq.), H280 <u>STOT SE 3, H336</u> |
| <u>Nitrous oxide</u> | | | ≤ 67ppm | ≤5ppm | ≤ 300ppm | ≤ 2ppm | |

3.2. Mixtures: Not applicable

SECTION 4: First aid 4.1. Description of first aid Move the victim to an uncontaminated area, putting on a breathing apparatus Inhalation Individual autonomy (ARI). Keep the victim warm and at rest. Call a doctor. Perform cardiopulmonary resuscitation if the victim stops breathing. Skin contact In case of frostbite, spray with water for at least 15 minutes. Apply a sterile dressing. Obtain medical assistance. Eye contact Immediately flush eyes with plenty of water for at least 15 minutes Ingestion Ingestion is not considered a possible mode of exposure 4.2. Most important symptoms and effects, both acute and delayed May have narcotic effects at low concentrations. Symptoms may include dizziness, headache, nausea and loss of coordination. Refer to section 11. 4.3. Indication of any immediate medical attention and special treatment needed : Obtain medical assistance. **SECTION 5: Fire-fighting measures** 5.1. Extinguishing media Suitable extinguishing agents Water spray or cloud The product does not burn, use fire-fighting measures appropriate for the surrounding fire Unsuitable extinguishing agents Do not use a jet of water to extinguish. 5.2. Special hazards arising from the substance or mixture Specific risks Maintains combustion. Exposure to fire may cause containers to rupture and explode Hazardous combustion products Nitric oxide/nitrogen dioxide 5.3. Advice for firefighters Specific methods Use extinguishing media suitable for the surrounding fire. Exposure to fire and heat may cause gas containers to rupture. Cool exposed containers with water spray from a protected location. Do not allow watering water used in emergency cases to flow into the gutters. If possible, stop the gas flow. Use water spray or cloud to reduce the fumes to the ground if possible In the event of a leak, do not spray the container with water. Water the surrounding area (from a protected location) to contain the fire. Move containers from fire area if it can be done without risk. Special protective equipment for firefighters Use a self-contained breathing apparatus (SCBA) and gas-tight, chemical-resistant protective clothing Standard EN 943-2: Protective clothing against liquid or gaseous chemicals, aerosols and solid particles. Gas-tight protective clothing for rescue teams. Standard EN 137 - Autonomous open circuit compressed air device with a full face mask. Standard EN 469: protective clothing for firefighters. Standard EN 659: Protective gloves For firefighters SECTION 6: Measures to be taken in the event of accidental release

| SECTIO | N 7: Handling and storage | | | |
| | Precautions for safe handling | | | |
| Safety whe | n using the product | The product must be handled in accordance with good industrial hygiene and safety procedure | | |
| | | Use only lubricants and seals approved for service | | |
| | | specific to the gas. Only persons with appropriate experience and training should handle gases under pressure. | | |
| | | Consider adding pressure safety valve(s) to the installation. | | |
| | | You ensure that the entire gas installation has been (or is regularly) checked for the absence of | | |
| | | leaks, before use | | |
| | | Do not smoke while handling the product. | | |
| | | Keep equipment free of oil and grease Do not use oil or grease. | | |
| | | Use only specified equipment appropriate for this product and its operating pressure and | | |
| | | temperature. Contact your gas supplier if in doubt. | | |
| | | Use only lubricants and seals approved for oxygen service | | |
| | | Use only with cleaned equipment approved for oxygen use and calculated for cylinder pressure | | |
| | | Temperatures above 150°C (300°F) should be avoided by all means possible to reduce the | | |
| | | occurrence of explosive decomposition of nitrous oxide. clean all surfaces in direct contact with nitrous oxide as for oxygen service. | | |
| | | Transfer pumps must be equipped with a shut-off system to avoid running dry | | |
| | | Use self-limiting heating systems. Electric heaters with direct contact with the product are not | | |
| | | permitted. | | |
| | | Avoid the return of water, acids and alkalis. | | |
| Safatywha | n handling the gas container | Do not breathe the gas. Refer to the supplicie instructions for handling the container | | |
| Salety wile | n handling the gas container | Refer to the supplier's instructions for handling the container. Prohibit products from rising into the container | | |
| | | Protect cylinders from physical damage, do not pull, roll, slide, drop | | |
| | | To move the bottles even a short distance, use a cart (bottle rolls, | | |
| | | etc.), designed for transporting bottles | | |
| | | Leave the tap protection cap in place until the container is again secured either by a wall or | | |
| | | support or placed in a container or placed in position for use. If the user encounters any difficulty opening or closing the cylinder valve, the user should | | |
| | | discontinue use and contact the supplier | | |
| | | Never attempt to repair or modify a container valve or its pressure relief devices. | | |
| | | Damaged faucets should be reported immediately to the supplier | | |
| | | Keep tap outlets from containers clean and not contaminated, particularly with oil or water. | | |
| | | If the container has been equipped with one, as soon as it has been disconnected from the | | |
| | | installation replace the cap of the tan evidet cap | | |
| | | installation, replace the cap or the tap outlet cap. Close the container tap after each use and when empty even if it is still connected to the | | |
| | | Close the container tap after each use and when empty, even if it is still connected to the | | |
| | | | | |
| | | Close the container tap after each use and when empty, even if it is still connected to the equipment. | | |
| | | Close the container tap after each use and when empty, even if it is still connected to the equipment. Never attempt to transfer gases from a bottle/container into another container. Never use a direct flame or electric heater to increase the pressure in the container. Do not remove or damage the labels put by the supplier to identify the contents of the bottle. | | |
| SARL RAYANOX ZA Bethioua Wila Algeria. | ya of Oran, | Close the container tap after each use and when empty, even if it is still connected to the equipment. Never attempt to transfer gases from a bottle/container into another container. Never use a direct flame or electric heater to increase the pressure in the container. | | |

Medical NITROGEN PROTOXYDE

Replaces sheet: 4.0 Revision date: 10/14/2021 Version: 5.0 SDS reference: EIGA093A Prevent water from being drawn into the container. Open the tap slowly to avoid a sudden build-up of pressure (water hammer). 7.2. Conditions for safe storage, including any incompatibilities Follow all local regulations and requirements for container storage. Containers should not be stored in conditions likely to aggravate corrosion. Container valve covers or caps must be in place. Containers must be stored in an upright position and secured to prevent falling. Containers in stock should be periodically checked for general condition and absence of leaks. Store the container in a well-ventilated area, at a temperature below 50°C In storage, separate flammable gases and other flammable materials Store containers in areas not exposed to the risk of fire and away from sources of heat and ignition. Keep away from combustible materials 7.3. Specific end use(s) : None). **SECTION 8: Exposure controls/personal protection** 8.1. Control Settings **OEL** (Occupational Exposure Limits) Local Name : Nitrous oxide **OEL TWA** : 180 mg/m3 OEL TWA [ppm] : 100 ppm : ILO and WHO 2018 ICSC: 0067 (June 2015) Reference DNEL (Derived No Effect Dose) : None established. PNEC (Predicted No Effect Concentration(s)) : None established. 8.2. Exposure controls 8.2.1. Appropriate technical controls Maintain appropriate exhaust ventilation locally and overall. Product to be handled in a closed system. Pressure equipment should be checked regularly for leaks Ensure that exposure limits are not exceeded (if available). Gas detectors should be used when oxidizing gases are likely to be released Think about work permits, e.g. for maintenance. 8.2.2. Personal protective equipment A risk analysis of the use of the product must be conducted and documented in all workplaces affected by the use of the product in order to choose personal safety equipment regarding the identified risks. The following recommendations should be considered Choose Personal Protective Equipment that complies with recommended EN/ISO standards. Eye/face protection Wear tight safety glasses and a face shield when transferring or disconnecting transfer lines. Standard EN 166 - Individual eye protection - Specifications. Skin protection -Hand protection Wear protective gloves when handling gas cylinders. Standard EN 388-Protective gloves against mechanical risks. Wear cold-insulating gloves during transfer or disconnection of transfer lines. Standard EN 511 - Insulating gloves against the cold. -Miscellaneous Consider the use of fire-resistant safety clothing. Standard EN ISO 14116 - Materials with limited flame expansion. Wear safety shoes when handling cylinders. Standard EN ISO 20345: Personal Protective Equipment - safety shoes. Gas filters can be used if all surrounding conditions are known, e.g. concentration and type of **Respiratory protection** impurities and duration of use. Use gas filters and a face mask when exposure limits can be exceeded for a short period e.g. connecting, disconnecting cylinders. Consult the product information of the respiratory equipment supplier to choose the most appropriate Gas filters do not protect against under-oxygenation. Standard EN 14387 - Respiratory protective devices - Anti-gas filters and combined filters and Standard EN 136 - Respiratory protective devices - full masks. Have a personal self-contained breathing apparatus (SCBA) ready for use in an emergency Self-contained breathing apparatus recommended when there is a risk of unknown exposure during maintenance activities on installation equipment. Standard EN 137 - Autonomous open circuit compressed air device with a full face mask.

|------------------------------------|
|------------------------------------|

12.1. <u>Toxicity</u> Assessment EC50 48h - Daphnia magna [mg/l] EC50 72h - Algae [mg/l] LC50 96 Hours - fish [mg/l] 12.2. <u>Persistence and degradability</u> Assessment

12.3. <u>Bioaccumulation potential</u> Assessment

12.4. <u>Mobility in the ground</u> Assessment

12.5. <u>Results of PBT and VPVB assessments</u> Assessment

12.6. Other adverse effects

Other adverse effects Effect on the ozone layer Global warming potential [CO2=1] Effect on global warming This product is ecologically safe. No data available. No data available. No data available.

Inhalation has narcotic effects

Not applicable to non-organic products

: Not applicable to gases and gas mixtures

: The classification criteria are not met.

No known effects with this product.
May cause drowsiness or dizziness.

No bioaccumulation to be expected in the event of a low log Kow (log Kow<4). See section 9.

Due to its high volatility, pollution of soil or water by this product is unlikely. Penetration into the ground not likely.

No data available.

- : May cause frost damage to vegetation.
- : No effect on the ozone layer.
- : 298

: May contribute to the greenhouse effect when discharged in large quantities.

: Contains greenhouse gas(es).

SECTION 13: Disposal Considerations

13.1. Waste treatment methods

Contact the supplier if instructions are needed.

Can be placed in a well-ventilated area

Do not discharge into any location where its accumulation could be hazardous.

Check that the emission levels imposed by local regulations or operating permits are not exceeded.

For further recommendations on gas disposal methods, refer to the EIGA code of practice Doc 30 "Disposal of gases", downloadable from http://www.eiga.eu.

Return the uneaten product to the supplier in its original container
